

## SNOW WHITE VASELINE (ASPPC 506)

### DESCRIPTION

**ASPPC 506** is a semi-solid mixture of hydrocarbons obtained from petroleum and bleached. It is a white, translucent, soft unctuous mass, retaining these characteristics on storage and when melted and allowed to cool without stirring.

### SOLUBILITY

Insoluble in water, soluble in chloroform, ether and petroleum spirit.

### FEATURES

Meets the requirements of USP

### TECHNICAL DATA

Physical Properties	Test Method	Results
Specific gravity @15°C/15°C	ASTMD1298	0.81 - 0.88
Congealing point, °C	ASTM D938	42-60
Cone penetration @ 25°C , 0.1mm	ASTM D937	100-300
Flash point, °C	ASTM D 92	170 min
Color	Visual	Snow white
Odor	-----	Odorless
Sulphated ash, wt%	ASTM D874	0.1 max

### STORAGE

Keep products closed in original packing in a dry area, under ambient conditions.  
The product is stable in original packing under dry conditions for 3 years max.

### PACKAGING

Steel barrel about 170 kg.

Tailor-made SNOW WHITE VASELINE of other properties can be produced as per request
